PROFESSIONAL SUMMARY

Dedicated Senior Odoo Developer with over 6+ years of hands-on experience in full-lifecycle ERP development, solution design, and team mentorship. Proven track record in executing complex Odoo migrations (v11 through v18), refactoring legacy codebases, and integrating third-party platforms including Magento, Xero, and payment gateways. Skilled in optimizing backend Python logic and PostgreSQL databases to ensure high performance under concurrent load. Focused on delivering practical ERP solutions that improve operational efficiency, data integrity, and system reliability.

TECHNICAL COMPETENCIES

- **ERP Systems:** Odoo (Community & Enterprise, Odoo.sh, v11–v18), Odoo Studio, HRMS, CRM, POS, Inventory Management, Accounting modules.
- **Backend & Frontend:** Python (advanced Odoo customization), JavaScript (Owl JS), XML, HTML5, CSS3, Jinja2.
- **Database Management:** PostgreSQL (Query optimization, performance tuning, indexing).
- **Integrations:** RESTful APIs, JSON-RPC, XML-RPC, Magento, Xero, Stripe, PayPal.
- **DevOps & Tools:** Git (GitLab, GitHub, Bitbucket), Jira, Redmine, CI/CD pipelines.
- **Methodologies:** Agile (Scrum/Kanban), Test-Driven Development (TDD), Code Review/Refactoring, Software Development Life Cycle (SDLC) management.
- **Server Management & Deployment:** DigitalOcean, Linux Server Administration, Odoo Deployment & Configuration, Production & Staging Environment Management, Nginx, PostgreSQL, SSL & DNS Configuration.

PROFESSIONAL EXPERIENCE

CTG (Committed To Good) | Senior Odoo Developer

June 2025 – May 2026

- **Odoo Migration Lead:** Managed the end-to-end migration of custom HRMS platforms from Odoo 11 to Odoo 18. Managed schema mapping, custom module refactoring, and extensive testing to ensure reliable data transfer without impacting business operations.
- **Performance Optimization:** Analyzed and optimized backend Python modules for high-concurrency environments. Implemented efficient ORM queries and caching mechanisms that reduced server memory footprint and improved response latency by 25%.
- **Security & Architecture:** Designed In-depth user permission frameworks and implemented security protocols for global NGO client partners (WHO, UNICEF, UNESCO). Ensured isolated, secure multi-region access for mission-critical data.
- **Strategic Planning:** Collaborated with cross-functional leadership to define technical roadmaps, ensuring that 22+ custom modules were deployed in alignment with organizational project requirements.
- **Technical Mentorship:** Mentored a team of junior developers on Odoo best practices and clean coding standards. This resulted in a 10% reduction in production-level bugs and significantly improved code quality and functional flow knowledge.

Bista Solutions | Senior Software Developer

February 2023 – May 2025

- **Migration & Integration:** Managed the large-scale migration of a promotional industry ERP system from Odoo 14 to Odoo 16. Refactored legacy custom modules, resolved dependency conflicts, and rebuilt third-party API integrations for improved stability.
- **Frontend UI/UX Enhancement:** Developed interactive, responsive frontend interfaces using Owl JS and JavaScript. These enhancements improved system usability, reducing navigation friction and support tickets by 20%.
- **Custom Backend Logic:** Engineered backend logic for complex rental management (LED/LCD assets). Developed tracking algorithms that optimized inventory accuracy and reduced asset wastage by 10% through automated reconciliation.
- **eCommerce Synchronization:** Built robust Odoo-Magento bridges, enabling real-time synchronization of stock levels and pricing, eliminating manual data entry.
- **Project Recognition:** Awarded the "Super Squad Award" (Q4 2024) for excellence in delivering high-complexity projects under strict delivery constraints.

Brainvire Infotech | Associate Software Developer

July 2021 – January 2023

- **Manufacturing Integration:** Architected and implemented seamless Odoo-Magento integrations for manufacturing clients, automating end-to-end data flows from online sales to ERP fulfillment.
- **POS Development:** Developed custom Point of Sale (POS) solutions for a book retail chain, implementing session management and offline-mode transaction handling to ensure business continuity.
- **Database Performance:** Performed deep-dive optimizations on PostgreSQL databases. Refactored complex views and optimized indexing strategies to increase real-time dashboard generation speed for executive reporting.
- **Barcode Workflow Optimization:** Integrated barcode scanning workflows into inventory modules, automating stock tracking and reducing warehouse scanning discrepancies by 20%.

Acespritech Solutions | Junior Odoo Developer

October 2020 – June 2021

- **Industry-Specific Modules:** Developed backend Odoo modules for various niches, including salon management, flower retail, and automotive repair systems.
- **Custom Tooling:** Created specialized features such as dynamic fuel indicator widgets and custom job card flows for vehicle repair systems, allowing service centers to track progress in real-time.
- **System Migration:** Assisted in the migration of legacy Hospital Management Systems in Odoo, integrating secure API endpoints to centralize patient records.
- **Lifecycle Support:** Supported the full development lifecycle for SME clients, handling everything from initial requirements gathering to deployment.
- **Client Testimonial:** "Darpan's dedication to refactoring our complex clinical database and integrating standardized WHO records was outstanding. His technical architecture and support during deployment ensured a seamless transition." – Jean Carlos, HMS Client

TECHNICAL PROJECT HIGHLIGHTS

- **Vehicle Repair system (Odoo 14):** Created Individual app with odoo fleet management for vehicle management, services And repair system with fuel meter and oodo meter custom widgets and maintenance flow.
- **Website Sale Distributor (Odoo 15):** This project is for adding partner as a sales distributor in website when we bought the product, we have to select the distributor on payment pages.
- **Go-Parking (Web-based Application):** Led the development of a parking management system. Utilized Agile workflows and delivered a functional beta within a 3-month cycle, featuring real-time slot booking and payment processing.
- **Digital Logic Helper (Android Application):** Developed core frontend features and led the QA phase for this educational app, focusing on UI responsiveness and memory management, achieving 99.9% stability and knowledge of Digital Logics.

EDUCATION

B.E. in Information Technology | Gujarat Technological University | 2020 | CGPA: 8.1

CERTIFICATIONS

- **Telecom Terminal Application Developer (Android):** NSDC (Government of India)
- **Web Development Certification:** Government Initiative
